

**FOR IMMEDIATE RELEASE**

**OFFICE MASTER LAUNCHES OM5 SERIES® EXTENSION:  
“OM5 ACTIVE” AT NEOCON SHOW**

*Seating company adds to the successful OM5 Series® family with a new line of innovative & ergonomic stacking chairs & simple Taskers*

**Ontario, California – May 28, 2013.** Mid-market seating manufacturer Office Master, Inc. of Southern California is poised to launch an exciting addition to its popular “dynamic ergonomics” task seating family, the OM5 Series®.

Set to be formally introduced at next month’s annual NeoCon World’s Trade Fair furniture show in Chicago, the **OM5 Active** is a collaborative seating collection that will feature three primary additions: a simple function, light task chair; a sled-based high-density stacker; a 4-legged side chair that will be available with glides or casters for mobility.

Centered on the well-balanced simplicity and dynamic ergonomics that are hallmarks of the original OM5 Series® task line, the entire OM5 Active collection promotes dynamic motion by virtue of a self-weighting chair top that will be available in 7 different shell colors & with various other options.

“Seating – when made right – should not be stagnant or restrictive, even if it’s just being used temporarily; as in a training room, conference or other ‘occasional’ setting,” suggested Office Master, Inc. President, Wallace Hwang. “With this new collection, we’ve striven to replace the uncomfortable and motionless stacking chairs that people have come to expect & dread in meetings, and instead, offer a comfortable and fluid option that we hope will not only be comfortable, but promote an even greater flow of ideas, and productive collaboration as well!”
